

Odorant receptors in fragrance, cosmetic and pharma research

The fascinating sense of smell is mediated by approximately 400 odorant receptors in humans

Our olfactory platform can be applied to:

- ❑ FRAGRANCE enhancement
- ❑ MALODOR control
- ❑ PHARMA projects related to ectopic odorant receptors

Our Services

Olfactory Platform

- Human odorant receptors and established cellular assays for efficient functional expression already available
- Suitable for:
 - deorphanization of odorant receptors
 - identification of odorant receptor modulators, either enhancing or blocking the receptor activity

Business model:

- Fee for service agreement
- Partnership agreement

Otto-Hahn-Straße, 15
D-44227 Dortmund
