

## **Job description: Laboratory Technician / Cell Biology**

**Konstanz, January 2023**

Axxam is a leading provider of integrated discovery services for the entire Life Sciences industries such as Pharmaceutical, Crop protection, Animal health, Cosmetics, Nutrition, and Flavour & Fragrances. We have a strong expertise across a broad range of discovery disciplines and innovative technologies including assay development, compound management, HTS, hit identification and hit validation. Axxam is also engaged in developing novel innovative therapies for diseases with a high unmet medical need.

An open and dynamic working environment ensures high-quality results from the teams of scientists and other professionals conducting all the experimental activities, supported by an industrialized organization.

We are currently seeking a **talented Laboratory Technician** to strengthen our activities in the Flavour and Fragrance research. The candidate will be responsible for generating a variety of cell-based assays, cell culture maintenance and development, data collection and analysis.

**You are highly motivated and fully committed with a strong profile in Cell Biology and will assist in a variety of in vitro cell-based signalling studies to characterize different molecular targets.**

### **Responsibilities:**

- Perform routine cell culture tasks, including passaging and maintaining cells under controlled conditions, as well as transient and stable gene expression in mammalian cells
- Use of reporter genes (luciferases) and other functional read-outs in mammalian cell lines
- Use of luminescence – fluorescence readers (e.g. FLIPR® technology)
- Record and analyze data, and maintain accurate and detailed laboratory records
- Operate and maintain laboratory equipment, including troubleshooting and performing basic repairs
- Follow safety protocols and maintain a clean and organized laboratory environment
- Communicate effectively with other members of the laboratory team and provide updates on progress and issues

### **Qualifications:**

Biological/Medical Technical Assistant (BTA/MTA) or Bachelor's degree in a relevant scientific field

- Laboratory experience, including experience with basic laboratory techniques and equipment, specifically on cell culture
- Familiarity with cell biology techniques and assays
- Strong attention to detail and accuracy in data collection and analysis
- Ability to work independently and as part of a team
- Strong organizational and problem-solving, as well as verbal and written communication skills
- Ability to work in a fast-paced environment and meet deadlines
- Familiarity with safety protocols in a laboratory setting

### **Axxam is an equal opportunity employer**

Axxam offers a stimulating work environment and a competitive salary. If your background and personal experience fit this profile, please send your complete application, including a brief description of your experience, a letter of motivation, and your CV to the address below or upload it at our on-line contact centre: [http://www.axxam.com/careers/send\\_resume](http://www.axxam.com/careers/send_resume).
